

Test Report no. 1693/13

Vasto, 18/10/2013

Client: V.A.R.M. S.r.l.
 S.S Flaminia Km 57,250 - 01033 CIVITA CASTELLANA (VT)

Date accepted: 15/10/2013 **Analysis start:** 15/10/2013 **End date:** 17/10/2013

Sample ID: 1693./13
Description of Sample: Water
 Time 0 - before treatment with UV system

Place / sampling point: Bathroom - toilet siphon

Sample size: 300 ml

Returning sample: No

Sampling

Sampled by: customer

Sample temperature at sampling: -

Sampling Procedure: by the Customer

Note to the sampling: -

Sampling certificate: 892

Sampling date: 14/10/2013

Sampling time:

NOTES:

- This test report is valid for all purposes of the law only in its original version, stamped, initialed and signed in its entirety or a certified copy the original.
- This test report may be freely reproduced in its entirety by the applicant only; partial reproduction must be explicitly authorized by The laboratory.
- The analytical results reported in this test report refer only to the sample tested.
- Storage time of the sample:
- The documentation useful for traceability of analytical results shall be kept on file for 4 years.
- The measurement uncertainty is calculated in accordance with the internal ILC 08.1.

LEGEND:

U: expanded measurement uncertainty expressed in natural value in the same units as the result. The values of expanded uncertainty contained in this test report refer to a confidence level of $p = 95\%$ and a coverage factor $k = 2$. In the case of microbiological test the expanded uncertainty is to be understood as a "confidence interval" to the level of probability 95%.

uc: sampling unit (rate).

t.a.: room temperature.

#: Test carried out in a single plate.

sc: surface area sampled

Test and reference method	u.c.	Unit of measure	Result	U
---------------------------	------	-----------------	--------	---

BIOLOGICAL PARAMETERS

Escherichia coli		CFU/100ml	74000	[.]
------------------	--	-----------	-------	-----

UNI EN ISO 9308-1:2002 #

Intestinal Enterococci		CFU/100ml	40000	[.]
